

How to upload a paper to arXiv

The submission procedure is well explained on <http://arxiv.org/help/>. There you find links to all possible actions and helps to problems that might occur. We here therefore explain the standard procedure only.

1 Newbies first register

Goto <http://arxiv.org/edit-user>. You are asked for your e-mail address and a user name and password of your choice. You need these for all future submissions and should well remember them. For more details: <http://arxiv.org/help/registerhelp>.

2 Submission of a paper

The recommended way is to prepare your paper as a (pdf)L^AT_EX source, preferably in its own directory with all *.eps, *.jpg or *.pdf figures necessary, and then packed as *.tar.gz or *.zip. In case your source is word or alike, produce a *.pdf source file. Avoid spaces or other special characters in the filename, allowed characters are: a-z A-Z 0-9 _ + - . = More details on <http://arxiv.org/help/submit>:

To Submit a Paper

Everyone who submits should read the following general information:

- We accept submissions only from [registered authors](#).
- Submitters must grant arXiv.org a [non-exclusive and irrevocable license to distribute](#) or certify that the work is available under another license that conveys these rights.
- [Title/Abstract preparation](#)
- [Formats for text submission](#)
- [Formats for figures](#)
- [Read our response and check your submission](#)
- [Replace your paper if necessary](#)
- [Take responsibility](#)
- Special instructions for [index submissions](#) for conference proceedings

Please note that we do not accept submissions with omitted figures, tables or sections. We also do not accept "abstract only" submissions. Such submissions are unhelpful to readers and of very limited archival value.

Note: arXiv will only accept the following characters in file names:
a-z A-Z 0-9 _ + - . , =

The presence of any other character (e.g. spaces, question marks, asterisks, etc.) will cause the system to reject the entire submission. File names and extensions are also case sensitive on our system.

- To submit a paper, use the [Submit form](#).

The availability of new submissions is explained below, in the section on [availability of submissions](#). Note further that all official versions of submitted papers are made publicly available. See the discussion of [submission version availability](#).

Formats for text of submission

Your submission to the archive must be in one of the following formats (listed in order of preference):

- [\(La\)TeX, AMS\(La\)TeX, PDFLaTeX](#)
- [DOCX \(Word 2007\)](#)
- [PDF](#)
- [PostScript](#)
- [HTML with JPEG/PNG/GIF images](#)

Our goal is to store papers in formats which are highly portable and stable over time. Currently, the best choice is TeX/LaTeX, because this open format does not hide information. Note that for this and other [reasons](#) we will not accept dvi, PS, or PDF created from TeX/LaTeX source. Users of word processors such as Microsoft Word (versions prior to Word 2007) should save their documents as PDF and submit that. Note also that we will not accept scanned documents, regardless of format.

Here you also find a link to the submit form <http://arxiv.org/submit> (requires login as registered user, see above). The basic questions you are asked are:

[arXiv.org](#) > Preliminary submission form

Preliminary submission form for binhest@mps.mpg.de

A. Verify Your Contact Information

It's important that you keep your contact information up to date, especially that we have your current E-mail address. Also, check to make sure that we've properly represented your name and institutional affiliation

First Name: Bernd
Last Name: Inhester
Suffix: (*Jr.*, *III*, etc; may be blank)
Affiliation: Max Planck Institute for Solar System Research
E-mail: binhest@mps.mpg.de

I certify that the above contact information is correct.

B. License Statement

In order to submit your article to arXiv.org, you must select a license or declaration that gives us the rights necessary to distribute your article (see [Discussion of Licenses](#) for more information).

arXiv.org perpetual, non-exclusive license to distribute this article (Minimal rights required by arXiv.org. Select this unless you understand the implications of other licenses)
 Creative Commons Attribution license
 Creative Commons Attribution-Noncommercial-ShareAlike license
 Creative Commons Public Domain Declaration (Suitable for US government employees, for example)
 I do not certify that any of the above licenses apply

C. Policy Statement

- ◆ I understand that submissions cannot be completely removed once accepted.
- ◆ I understand that arXiv.org reserves the right to reclassify or reject any submission.

I agree to the above policies.

D. Archive and Subject Class

Choose a target for this submission:

◆

D. The Files

Are you uploading more than 1 file? (Note that multiple files are most efficiently uploaded as a single [tar.gz](#) or [zip](#) file, in which case a single file upload window will suffice.) If for some reason you'll need multiple file upload windows, specify here:
I'll need file upload window(s).

- Concerning the license statement:

The usual choice is the **perpetual, nonexclusive license** for a paper submitted elsewhere. Note that you certify that you have the right to grant this license. Look up in <http://www.sherpa.ac.uk/romeo/> whether the journal allows you to upload you paper in a repository. In most cases, they do.

- Archive and Subject class:

A typical choice for our field is archive: astrophysics, subject: solar astrophys or archive: physics, subject: geophysics or fluid dynamics

In a follow-up form you will have to add **title**, **authors**, **affiliations** and **abstract**. Keep an editor with your *.tex source open while filling the submission forms and copy the above items with the clipboard.

You are also asked for the **journal reference** to the original paper and its **doi**. If you do not have this information, you can add this any later time, see <http://arxiv.org/help/jref>. Note, it is not only useful to add this data so that readers of your arXiv paper can properly cite the original paper. Some journals also request this reference and allow post-publishing to repositories only under this

condition.

Finally you give the **filename** which is then uploaded, the latex source is compiled and you receive an answer within minutes, whether the compilation was successful. To my experience, submissions are rejected only because of an excessive size of some figures. Especially *.eps files may be very large and are often rejected when they are bigger than some 100kB. The critical size of the whole package is about 4 MB. There is some help offered on <http://arxiv.org/help/sizes>.

Your submitted paper receives a public **reference ID** so that it can be found in the archive. You also obtain a private **paper identifier** of the sort *astro-ph.username.number* which you need when you want to add the journal reference to your submission or if you want to replace your uploaded paper by a revised version.

After successful submission, you receive an email within some minutes with an url to view the pdf which has been produced. If you find something needs to be changed (typos in title, author etc or sometimes details of the layout), do the changes in your own source file, pack it again as *.tar.gz or *.zip, upload the file after logging onto the replace web page <http://arxiv.org/help/replace>.
