ROYAL ASTRONOMICAL SOCIETY

ASTRONOMY & GEOPHYSICS

Astronomy & Geophysics publishes papers, review papers, news and comment on topics of interest to astronomers and geophysicists, including matters concerning Fellows of the Royal Astronomical Society. Papers for publication should be submitted to the Editor. Topical material is preferred. Publication will be as fast as is compatible with referees' and authors' responses. See the RAS web pages at www.ras.org.uk/ or email to info@ras.org.uk

Editor: Sue Bowler
Dept of Physics and Astronomy,
University of Leeds, Leeds LS2 9JT, UK
Tel: +44 (0)113 343 6672
Fax: +44 (0)113 343 3900
Email: s.bowler@leeds.ac.uk
Editorial Assistant: Amanda McCaig

CONTENTS

NEWS

- 4 The end of the beginning for Cassini-Huygens; Transit of Venus observed; appointments and awards; sunlit uplands.

VIEWS

- 6 Halley's comet of 87 BC on the coins of Armenian king Tigranes?

FEATURES

- 7 **Understanding the solar dynamo**
Paul Bushby and Joanne Mason take a look at this enigmatic magnetic engine from the development of physical theory through current ideas to the possibilities for future understanding.

- 14 **Solar convection and magnetic fields**
Mike Proctor explores the role of magnetism and convection in the Sun's photosphere using powerful numerical simulations.

- 21 **Helioseismology and the Sun's interior**
Michael J Thompson gets under the skin of the Sun using waves on its surface.

- 26 **Seismology of the corona of the Sun**
V M Nakariakov and E Verwichte exploit seismology in the study of the solar corona, the hot atmosphere of the Sun.

- 28 **The puzzling structure of a sunspot**
Why does a sunspot look the way it does? Steven Tobias and Nigel Weiss find answers by relating new high-resolution observations to recent theoretical studies of the spot's magnetic field.

- 34 **Heating in the solar atmosphere**
Robert Erdélyi reviews ways and means of heating the corona.

- 38 **The solar wind and the Sun-Earth link**
Plasma streams out from the Sun in the form of the solar wind. Shadia Rifai Habbal and Richard Woo examine the workings of this enigmatic link between the Earth and the Sun.

REVIEWS

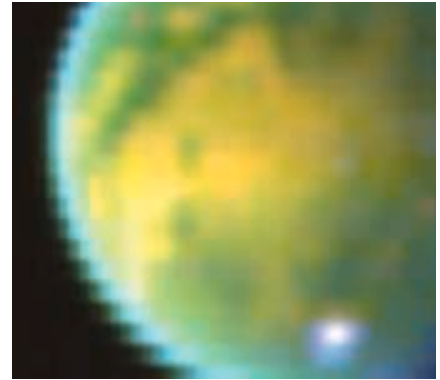

- 44 The Sun: for academics, students and idiots.

SOCIETY NEWS

- 46 The new RAS President: Prof. Kathy Whaler; RAS offers Chartered Scientist status; nominations please; can you help your Society?

DIARY

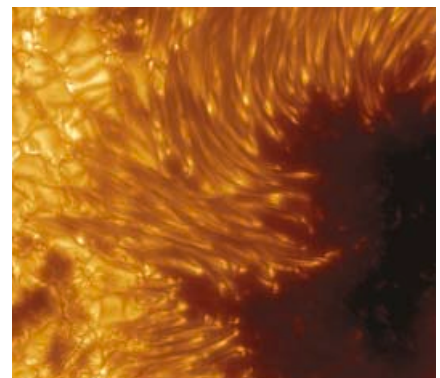

- 47 Forthcoming meetings and events; RAS contacts.

Cassini goes to work: Titan, p4

Exploring the heating of the Sun's corona, p34

The mysterious structure of sunspots, p28

Cover: An extensive erupting prominence taken by the EIT on SOHO on 15 May 2001. The hottest areas appear almost white, while the darker red areas indicate cooler temperatures. (Courtesy of SOHO/EIT consortium. SOHO is a project of international cooperation between ESA and NASA.)
